Emotes have been added to the main branch of Rust for all to use. In this tutorial I’ll show you how to use the new gestures.

Simply type gesture (name of gesture) in the console (F1) to execute one, list as follows:

- wave
- victory
- shrug
- thumbsup
- chicken
- hurry
- whoa

You can also bind them to a key. In the console (F1) type bind (key you want to use) “gesture (name of gesture)” (include the quotes)

Radial menu and more emotes to follow!

Thank you for watching.

The only aim in Rust is to survive.

To do this you will need to overcome struggles such as hunger, thirst and cold. Build a fire. Build a shelter. Kill animals for meat. Protect yourself from other players, and kill them for meat. Create alliances with other players and form a town.

Whatever it takes to survive.
